Gather and Organize your Photos

Gather your print photos. Write the filename and description of each digital photo on an index card (or similarly sized piece of paper). Place pictures and index cards in the order you want them in the show and number the back (use post-it notes on print photos to prevent damage). When filling out parts of this form that request photo information, use the number from the back of the photo. Our shows generally display 8-12 pictures per minute, so 100 pictures would make an 8-12 minute slideshow.

There is an extra charge for each additional chapter (see pricing worksheet). See the last page of this order form for a sample title menu with Chapters. Make one copy of this page for each desired Chapter.
